

Azara DRVS Corner: How can I get my DRVS Homepage to show my top priority measures?

Greetings! In this section of our newsletter, tips and tricks for using Azara DRVS will be posted. For example, did you know you can change the homepage listing of scorecard? If you click on your name in the top right corner and select “Preferences” (Fig. 1) you can change the displayed measures to any of the options shown (Fig. 2). Thereby when you open DRVS, you’ll be able to see the measures immediately. If your health center has decided to focus on Adult Diabetes measures, for instance, you can select the Adult Diabetes Scorecard option and have your most current results displayed every time you open Azara DRVS (Fig. 3). Also, be on the lookout for announcements and events on the homepage- AACHC & Azara can notify you in DRVS of upcoming opportunities.
